Subject index of volume 331

acetylcholine release, d-tubocurarine, nicotine, cytisine; brain, guinea-pig 293
adenosine agonists-antagonists, prolactin, dopamine; pituitary gland, rats 140
adenosine analogs, isoprenaline-antagonism, adenylate cyclase, adenosine receptors; heart, guinea-pig 131
adenosine receptors, adenosine analogs, isoprenaline-antagonism, adenylate cyclase; heart, guinea-pig 131
adenosine receptors, adenylate cyclase, xanthines; lung, guinea-pig 89
adenylate cyclase, adenosine receptors, adenosine analogs, isoprenaline-antagonism; heart, guinea-pig 131
adenylate cyclase, alpha2-adrenoceptors, noradrenaline release; hippocampus, rabbit 235
adenylate cyclase, guanine nucleotide, beta-adrenoceptors; heart ischemia, dog 71
adenylate cyclase, xanthines, adenosine receptors; lung, guinea-pig 89
adrenoceptors, ICI 118,551, bupranolol, catecholamines; lung, heart, guinea-pig 40
adrenoceptors, inotropic effect, propranolol; human heart 60
adrenoceptor-subtypes; lung, heart, guinea-pig 52
alpha2-adrenoceptors, noradrenaline release, adenylate cyclase; hippocampus, rabbit 235
alpha-adrenoceptors, beta-adrenoceptors, smooth muscle contraction, desmethylimipramine; ileum, guinea-pig 316
ATP, potassium channel, nicorandil; small intestine, guinea-pig 96
ATP, verapamil, noradrenergic neurotransmission; vas deferens, rats 347
azosemide, ozolinone, furosemide, ototoxicity, piretanide, bumetanide; cat 275

Bay K 8644, calcium channel agonist, nifedipine, verapamil, muscarinic receptor; duodenum, rats 290
Bay K 8644, calcium channel, neurotransmitter; brain, rats 114
beta 1-adrenoceptors, bisoprolol, catecholamines; heart, cat, guinea-pig 27
beta-adrenoceptor agonists, sympathomimetic amines; guinea-pig 240
beta-adrenoceptors, adenylate cyclase, guanine nucleotide; heart ischemia, dog 71
beta-adrenoceptors, occupancy-response relationship; vas deferens, rats 324
beta-adrenoceptors, smooth muscle contraction, desmethylimipramine, alpha-adrenoceptors; ileum, guinea-pig 316
beta-casomorphins, opiod-peptides; ileum, guinea-pig 351
bethanechol enantiomers, cholinesterases; ileum, guinea-pig 307
bile acid transport, iodipamide; hepatocytes, rats 393
bisoprolol, catecholamines, beta-adrenoceptors; heart, cat, guinea-pig 27
bromocriptine, locomotor activity, dopamine receptors; behaviour, mice 7
bumetanide, azosemide, ozolinone, furosemide, ototoxicity, piretanide; cat 275
bupranolol, catecholamines, adrenoceptors, ICI 118,551; lung, heart, guinea-pig 40

Ca antagonists, verapamil, isosorbide dinitrate; vascular smooth muscle, rabbit, dog 376
cAMP, hexose transport, methylxanthines, intestinal transport; jejunum, rats 384
cAMP, prostacyclin, forskolin, platelet deaggregation; human platelets 119
calcitonin gene-related peptide, capsaicin, sensory nerves; heart, guinea-pig 146
calcium antagonists, FK 33-824; vas deferens, mice 82
calcium channel agonist, nifedipine, verapamil, muscarinic receptor, Bay K 8644; duodenum, rats 290
calcium channel, neurotransmitter, Bay K 8644; brain, rats 114
calcium, propranolol, contractile proteins, sarcoplasmic reticulum; striated muscle, rabbit 194
capsaicin, pulmonary reflexes; lung, dog 166
capsaicin, sensory nerves, calcitonin gene-related peptide; heart, guinea-pig 146
capsaicin, somatostatin, cholecystokinin, nociception, substance P; frogs 159
carbonyl reductase, metyrapone, metyrapol, drug metabolism; liver homogenates, mice 283
carrier-substrate complex, chromaffin granules, catecholamines, transport kinetics; bovine adrenal medulla 209
catecholamines, adrenoceptors, ICI 118,551, bupranolol; lung, heart, guinea-pig 40
catecholamines, beta-adrenoceptors, bisoprolol; heart, cat, guinea-pig 27
catecholamines, MPTP, parkinsonism; striatum, mice 1
catecholamines, transport kinetics, carrier-substrate complex, chromaffin granules; bovine adrenal medulla 209
cholecystokinin, nociception, substance P, capsaicin, somatostatin; frogs 159
choline, dexamethasone; synaptosomes, rats 117
cholinergic agonists, ganglionic stimulation, muscarinic receptor subtypes; pithed rats 301
cholinesterases, bethanechol enantiomers; ileum, guinea-pig 307
chromaffin granules, catecholamines, transport kinetics, carrier-substrate complex; bovine adrenal medulla 209
circling behaviour, pyrethroid insecticides, deltamethrin, sodium channel; striatum, rats 341
contractile proteins, sarcoplasmic reticulum, calcium, propranolol; striated muscle, rabbit 194
coronary occlusion, platelet aggregation, prostanoids, nafazatrom; heart, dog 267
cyanopindolol, serotonin autoreceptors; brain, rats 398
cytisine, acetylcholine release, d-tubocurarine, nicotine; brain, guinea-pig 293

defibrotide, prostacyclin, thromboxane, urokinase, fibrinolysis; platelet perfused heart, guinea-pig 125
deltamethrin, sodium channel, circling behaviour, pyrethroid insecticides; striatum, rats 341
delta-typ receptors, locomotor activity, opioids, mu-typ receptors; nucleus accumbens, septum mediale, rats 175
deprenyl, MDL 72145, MAO B inhibition; rats, mice 186
desipramine, locomotor activity, serotoninergic system, p-chlorophenylalanine; behaviour, rats 20
desmethylimipramine, alpha-adrenoceptors, beta-adrenoceptors, smooth muscle contraction; ileum, guinea-pig 316
dexamethasone, choline; synaptosomes, rats 117
dl-threo-dihydroxyphenylserine, noradrenaline precursor; rats 202
dopamine, adenosine agonists-antagonists, prolactin; pituitary gland, rats 140
dopamine agonists, dopamine autoreceptors, tyrosine hydroxylase; striatum, rats 12
dopamine autoreceptors, tyrosine hydroxylase, dopamine agonists; striatum, rats 12
dopamine receptors, bromocriptine, locomotor activity; behaviour, mice 7
dopaminergic neurons, serotoninergic neurons, swimming stress, voltammetry; striatum, rats 23
drug metabolism, carbonyl reductase, metyrapone, metyrapol; liver homogenates, mice 283
drug metabolism, reabsorption, fentanyl; autoradiography, rats 359
d-tubocurarine, nicotine, cytisine, acetylcholine release; brain, guinea-pig 293

exocytotic release, phorbol ester, protein kinase C; salivary gland, rats 122
extraneuronal uptake, isoprenaline, ventricular fibrillation; heart, rats 76

fentanyl, drug metabolism, reabsorption; autoradiography, rats 359
fibrinolysis, defibrotide, prostacyclin, thromboxane, urokinase; platelet perfused heart, guinea-pig 125
FK 33-824, calcium antagonists; vas deferens, mice 82
FLA 668, MAO A inhibitor, neuronal uptake; saphenous vein, dog 181
fluorescent dyes, narcotic antagonists, narcotics; ileum, guinea-pig 355
forskolin, platelet deaggregation, cAMP, prostacyclin; human platelets 119
furosemide, ototoxicity, piretanide, bumetanide, azosemide, ozolinone; cat 275

GABAergic system, noradrenergic transmission; brain, rats 225
gallamine, noradrenaline release; salivary gland, rats 220
ganglionic stimulation, muscarinic receptor subtypes, cholinergic agonists; pithed rats 301
glibenclamide, insuline secretion, potassium flux; pancreatic beta-cells, mice 104
glomerular filtration, maleat, tubuloglomerular feedback; kidney, rats 253
guanine nucleotide, beta-adrenoceptors, adenylate cyclase; heart ischemia, dog 71

ICI 118,551, bupranolol, catecholamines, adrenoceptors; lung, heart, guinea-pig 40
inotropic effect, propranolol, adrenoceptors; human heart 60
insuline secretion, potassium flux, glibenclamide; pancreatic beta-cells, mice 104
intestinal transport, cAMP, hexose transport, methylxanthines; jejunum, rats 384
iodipamide, bile acid transport; hepatocytes, rats 393
isoprenaline, ventricular fibrillation, extraneuronal uptake; heart, rats 76
isoprenaline-antagonism, adenylate cyclase, adenosine receptors, adenosine analogs; heart, guinea-pig 131
isosorbide dinitrate, Ca antagonists, verapamil; vascular smooth muscle, rabbit, dog 376

hexose transport, methylxanthines, intestinal transport, cAMP; jejunum, rats 384
histamine receptors, LSD, §5§-HT receptors; ileum, guinea-pig 311
§5§-HT receptors, histamine receptors, LSD; ileum, guinea-pig 311
hyperactivity; nucleus accumbens, rats 334

lidocaine, phenytoin, sodium channel, quinidine; papillary muscle, guinea-pig 369
locomotor activity, dopamine receptors, bromocriptine; behaviour, mice 7
locomotor activity, opioids, mu-typ receptors, delta-typ receptors; nucleus accumbens, septum mediale, rats 175
locomotor activity, serotoninergic system, p-chlorophenylalanine, desipramine; behaviour, rats 20
LSD, §5§-HT receptors, histamine receptors; ileum, guinea-pig 311

maleat, tubuloglomerular feedback, glomerular filtration; kidney, rats 253
MAO A inhibitor, neuronal uptake, FLA 668; saphenous vein, dog 181
MAO B inhibition, deprenyl, MDL 72145; rats, mice 186
MDL 72145, MAO B inhibition, deprenyl; rats, mice 186
MPTP, parkinsonism, catecholamines; striatum, mice 1
methylxanthines, intestinal transport, cAMP, hexose transport; jejunum, rats 384
metyrapol, drug metabolism, carbonyl reductase, metyrapone; liver homogenates, mice 283
metyrapone, metyrapol, drug metabolism, carbonyl reductase; liver homogenates, mice 283
mucosal transport, substance P, serotonin, non-cholinergic mechanism; small intestine, guinea-pig 260
muscarinic receptor, Bay K 8644, 2calcium channel agonist, nifedipine, verapamil; duodenum, rats 290
muscarinic receptor; human tracheal smooth muscle 247
muscarinic receptor subtypes, cholinergic agonists, ganglionic stimulation; pithed rats 301
mu-typ receptors, delta-typ receptors, locomotor activity, opioids; nucleus accumbens, septum mediale, rats 175

nafazatrom, coronary occlusion, platelet aggregation, prostanoids; heart, dog 267
narcotic antagonists, narcotics, fluorescent dyes; ileum, guinea-pig 355
narcotics, fluorescent dyes, narcotic antagonists; ileum, guinea-pig 355
neuronal uptake, FLA 668, MAO A inhibitor; saphenous vein, dog 181
neurotransmitter, Bay K 8644, calcium channel; brain, rats 114
nicorandil, ATP, potassium channel; small intestine, guinea-pig 96
nicotine, cytisine, acetylcholine release, d-tubocurarine; brain, guinea-pig 293
nifedipine, verapamil, muscarinic receptor, Bay K 8644, calcium channel agonist; duodenum, rats 290
nociception, substance P, capsaicin, somatostatin, cholecystokinin; frogs 159
nociception, substance P; tail flick test, rats 152
non-cholinergic mechanism, mucosal transport, substance P, serotonin; small intestine, guinea-pig 260
noradrenaline precursor, dl-threo-dihydroxyphenylserine; rats 202
noradrenaline release, adenylate cyclase, alpha2-adrenoceptors; hippocampus, rabbit 235
noradrenaline release, gallamine; salivary gland, rats 220
noradrenergic neurotransmission, ATP, verapamil; vas deferens, rats 347
noradrenergic transmission, GABAergic system; brain, rats 225

occupancy-response relationship, beta-adrenoceptors; vas deferens, rats 324
opiod-peptides, beta-casomorphins; ileum, guinea-pig 351
opioids, mu-typ receptors, delta-typ receptors, locomotor activity; nucleus accumbens, septum mediale, rats 175
ototoxicity, piretanide, bumetanide, azosemide, ozolinone, furosemide; cat 275
ozolinone, furosemide, ototoxicity, piretanide, bumetanide, azosemide; cat 275

parkinsonism, catecholamines, MPTP; striatum, mice 1
p-chlorophenylalanine, desipramine, locomotor activity, serotoninergic system; behaviour, rats 20
phenytoin, sodium channel, quinidine, lidocaine; papillary muscle, guinea-pig 369
phorbol ester, protein kinase C, exocytotic release; salivary gland, rats 122
piretanide, bumetanide, azosemide, ozolinone, furosemide, ototoxicity; cat 275
platelet aggregation, prostanoids, nafazatrom, coronary occlusion; heart, dog 267
platelet aggregation, vernolepin; platelets, rabbit 108
platelet deaggregation, cAMP, prostacyclin, forskolin; human platelets 119
potassium channel, nicorandil, ATP; small intestine, guinea-pig 96
potassium flux, glibenclamide, insuline secretion; pancreatic beta-cells, mice 104
prolactin, dopamine, adenosine agonists-antagonists; pituitary gland, rats 140
propranolol, adrenoceptors, inotropic effect; human heart 60
propranolol, contractile proteins, sarcoplasmic reticulum, calcium; striated muscle, rabbit 194
prostacyclin, forskolin, platelet deaggregation, cAMP; human platelets 119
prostacyclin, thromboxane, urokinase, fibrinolysis, defibrotide; platelet perfused heart, guinea-pig 125
prostanoids, nafazatrom, coronary occlusion, platelet aggregation; heart, dog 267
protein kinase C, exocytotic release, phorbol ester; salivary gland, rats 122
pulmonary reflexes, capsaicin; lung, dog 166
pyrethroid insecticides, deltamethrin, sodium channel, circling behaviour; striatum, rats 341

quinidine, lidocaine, phenytoin, sodium channel; papillary muscle, guinea-pig 369

reabsorption, fentanyl, drug metabolism; autoradiography, rats 359

sarcoplasmic reticulum, calcium, propranolol, contractile proteins; striated muscle, rabbit 194
sensory nerves, calcitonin gene-related peptide, capsaicin; heart, guinea-pig 146
serotonin autoreceptors, cyanopindolol; brain, rats 398
serotonin, non-cholinergic mechanism, mucosal transport, substance P; small intestine, guinea-pig 260
serotoninergic neurons, swimming stress, voltammetry, dopaminergic neurons; striatum, rats 23
serotoninergic system, p-chlorophenylalanine, desipramine, locomotor activity; behaviour, rats 20
smooth muscle contraction, desmethylimipramine, alpha-adrenoceptors, beta-adrenoceptors; ileum, guinea-pig 316
sodium channel, circling behaviour, pyrethroid insecticides, deltamethrin; striatum, rats 341
sodium channel, quinidine, lidocaine, phenytoin; papillary muscle, guinea-pig 369
somatostatin, cholecystokinin, nociception, substance P, capsaicin; frogs 159
somatostatin, vasoactive intestinal polypeptide, substance P; mast cells, rats, human skin 364
substance P, capsaicin, somatostatin, cholecystokinin, nociception; frogs 159
substance P, nociception; tail flick test, rats 152
substance P, serotonin, non-cholinergic mechanism, mucosal transport; small intestine, guinea-pig 260
substance P, somatostatin, vasoactive intestinal polypeptide; mast cells, rats, human skin 364
swimming stress, voltammetry, dopaminergic neurons, serotoninergic neurons; striatum, rats 23
sympathomimetic amines, beta-adrenoceptor agonists; guinea-pig 240

thromboxane, urokinase, fibrinolysis, defibrotide, prostacyclin; platelet perfused heart, guinea-pig 125
transport kinetics, carrier-substrate complex, chromaffin granules, catecholamines; bovine adrenal medulla 209
tubuloglomerular feedback, glomerular filtration, maleat; kidney, rats 253
tyrosine hydroxylase, dopamine agonists, dopamine autoreceptors; striatum, rats 12

urokinase, fibrinolysis, defibrotide, prostacyclin, thromboxane; platelet perfused heart, guinea-pig 125

vasoactive intestinal polypeptide, substance P, somatostatin; mast cells, rats, human skin 364
ventricular fibrillation, extraneuronal uptake, isoprenaline; heart, rats 76
verapamil, isosorbide dinitrate, Ca antagonists; vascular smooth muscle, rabbit, dog 376
verapamil, muscarinic receptor, Bay K 8644, calcium channel agonist, nifedipine; duodenum, rats 290
verapamil, noradrenergic neurotransmission, ATP; vas deferens, rats 347
vernolepin, platelet aggregation; platelets, rabbit 108
voltammetry, dopaminergic neurons, serotoninergic neurons, swimming stress; striatum, rats 23

xanthines, adenosine receptors, adenylate cyclase; lung, guinea-pig 89

Contents of volume 331

No. 1 issued on October 14, 1985

G. Jonsson, E. Sundström, I. Mefford, L. Olson, S. Johnson, R. Freedman, B. Hoffer: Electrophysiological and neurochemical correlates of the neurotoxic effects of 1-methyl-4-phenyl-1,2,3,6-tetrahydropyridine (MPTP) on central catecholamine neurons in the mouse **1**

O. F. Jenkins, D. M. Jackson: Bromocriptine potentiates the behavioural effects of directly and indirectly acting dopamine receptor agonists in mice **7**

C. J. Fowler, G. Thorell, M. Andersson, O. Magnusson: Is inhibition of striatal synaptosomal tyrosine hydroxylation by dopamine agonists a measure of dopamine autoreceptor function? **12**

N. Brunello, A. Volterra, R. Cagiano, G. C. Ianieri, V. Cuomo, G. Racagni: Biochemical and behavioral changes in rats after prolonged treatment with desipramine: interaction with p-chlorophenylalanine **20**

M. Ikeda, T. Nagatsu: Effect of short-term swimming stress and diazepam on 3,4-dihydroxyphenylacetic acid (DOPAC) and 5-hydroxyindoleacetic acid (5-HIAA) levels in the caudate nucleus: an in vivo voltammetric study **23**

A. J. Kaumann, H. Lemoine: Direct labelling of myocardial β_1-adrenoceptors. Comparison of binding affinity of ^{3}H-(−)-bisoprolol with its blocking potency **27**

H. Lemoine, B. Ehle, A. J. Kaumann: Direct labelling of β_2-adrenoceptors. Comparison of binding potency of ^{3}H-ICI 118,551 and blocking potency of ICI 118,551 **40**

B. Ehle, H. Lemoine, A. J. Kaumann: Improved evaluation of binding of ligands to membranes containing several receptor-subtypes **52**

E. Gille, H. Lemoine, B. Ehle, A. J. Kaumann: The affinity of (−)-propranolol for β_1- and β_2-adrenoceptors of human heart. Differential antagonism of the positive inotropic effects and adenylate cyclase stimulation by (−)-noradrenaline and (−)-adrenaline **60**

C. Devos, P. Robberecht, P. Nokin, M. Waelbroeck, M. Clinet, J. C. Camus, P. Beaufort, P. Schoenfeld, J. Christophe: Uncoupling between beta-adrenoceptors and adenylate cyclase in dog ischemic myocardium **71**

K. Sono, K. Kurahashi, M. Fujiwara: Changes in the incidence and duration of ventricular fibrillation in dependence on the extraneuronal accumulation of isoprenaline in the perfused rat heart **76**

G. Zetler, M. Kaschube: Importance of frequency and pulse width in field stimulation of the mouse vas deferens: different behaviour of twitch-inhibiting drugs **82**

D. Ukena, C. G. Schirren, K.-N. Klotz, U. Schwabe: Evidence for an A_2 adenosine receptor in guinea pig lung **89**

K. Yamanaka, K. Furukawa, K. Kitamura: The different mechanisms of action of nicorandil and adenosine triphosphate on potassium channels of circular smooth muscle of the guinea-pig small intestine **96**

L. Norlund, P. Lindström, J. Sehlin: Effects of glibenclamide and tetracaine on $^{86}Rb^+$ fluxes in mouse pancreatic β-cells **104**

G. M. Laekeman, F. De Clerck, A. J. Vlietinck, A. G. Herman: Vernolepin: an antiplatelet compound of natural origin **108**

Short communications

D. N. Middlemiss: The calcium channel activator, Bay K 8644, enhances K^+-evoked efflux of acetylcholine and noradrenaline from rat brain slices **114**

R. G. King, S. Dawson: Effects of dexamethasone on [^{3}H]choline uptake by rat forebrain synaptosomes **117**

T. Kariya, F. Morito, T. Sakai, K. Takahata, M. Yamanaka: Effect of forskolin on platelet deaggregation and cyclic AMP generation **119**

A. R. Wakade, R. K. Malhotra, T. D. Wakade: Phorbol ester, an activator of protein kinase C, enhances calcium-dependent release of sympathetic neurotransmitter **122**

No. 2/3 issued on November 13, 1985

P. Löbel, K. Schrör: Selective stimulation of coronary vascular PGI_2 but not of platelet thromboxane formation by defibrotide in the platelet perfused heart **125**

M. Böhm, R. Brückner, W. Meyer, M. Nose, W. Schmitz, H. Scholz, J. Starbatty: Evidence for adenosine receptor-mediated isoprenaline-antagonistic effects of the adenosine analogs PIA and NECA on force of contraction in guinea-pig atrial and ventricular cardiac preparations **131**

S. F. Stewart, T. A. Pugsley: Increase of rat serum prolactin by adenosine analogs and their blockade by the methylxanthine aminophylline **140**

A. Franco-Cereceda, J. M. Lundberg: Calcitonin gene-related peptide (CGRP) and capsaicin-induced stimulation of heart contractile rate and force **146**

J. Sawynok, G. Robertson: Desensitization to substance P following intrathecal injection. A technique for investigating the role of substance P in nociception **152**

S. Chéry-Croze, F. Godinot, G. Jourdan, C. Bernard, J. A. Chayvialle: Capsaicin in adult frogs: Effects on nociceptive responses to cutaneous stimuli and on nervous tissue concentrations of immunoreactive substance P, somatostatin and cholecystokinin **159**

Y. Monsereenusorn, S. S. Cassidy, J. R. Coast: Sensitivity of pulmonary chemo reflexes and lung inflation reflexes to repetitive stimulation and to inhibition with lidocaine **166**

U. Havemann, K. Kuschinsky: Locomotor activity of rats after injection of various opioids into the nucleus accumbens and the septum mediale **175**

M. M. Caramona, J. V. Esplugues, W. Osswald: Effects of a monoamine oxidase A inhibitor, FLA 668 (+) on the adrenergic mechanisms of the dog saphenous vein **181**

J. R. Fozard, M. Zreika, M. Robin, M. G. Palfreyman: The functional consequences of inhibition of monoamine oxidase type B: comparison of the pharmacological properties of L-deprenyl and MDL 72145 **186**

J. Y. Su, D. A. Malencik: Effects of (±)-propranolol on intracellular mechanisms of contraction in striated muscle of the rabbit **194**

A. Reches, V. J. Lewis, S. Fahn: DL-threo-DOPS as a precursor of noradrenaline **202**

G. Kobold, R. Langer, A. Burger: Does the carrier of chromaffin granules transport the protonated or the uncharged species of catecholamines? **209**

R. K. Malhotra, T. D. Wakade, A. R. Wakade: Facilitation of noradrenaline release by gallamine in the rat salivary gland **220**

T. Dennis, O. Curet, T. Nishikawa, B. Scatton: Further evidence for, and nature of, the facilitatory GABAergic influence on central noradrenergic transmission **225**

C. Allgaier, T. J. Feuerstein, R. Jackisch, G. Hertting: Islet-activating protein (pertussis toxin) diminishes α_2-adrenoceptor mediated effects on noradrenaline release **235**

P. Molenaar, G. A. McPherson, E. Malta, C. Raper: The influence of molecular structure on the affinity and efficacy of some β-adrenoceptor agonists **240**

C. J. van Koppen, J. F. Rodrigues de Miranda, A. J. Beld, M. W. Hermanussen, J. W. J. Lammers, C. A. M. van Ginneken: Characterization of the muscarinic receptor in human tracheal smooth muscle **247**

K. H. Leser, H. Osswald: Maleate induced fall of glomerular filtration rate. A micropuncture study in the rat **253**

J. R. Keast, J. B. Furness, M. Costa: Investigations of nerve populations influencing ion transport that can be stimulated electrically, by serotonin and by a nicotinic agonist **260**

V. B. Fiedler, M. Mardin, E. Perzborn, R. Grützmann: The effects of nafazatrom in an acute occlusion-reperfusion model of canine myocardial injury **267**

K. H. Göttl, A. Roesch, R. Klinke: Quantitative evaluation of ototoxic side effects of furosemide, piretanide, bumetanide, azosemide and ozolinone in the cat – a new approach to the problem of ototoxicity **275**

E. Maser, W. Legrum: Alteration of the inhibitory effect of metyrapone by reduction to metyrapol during the metabolism of methacetin in vivo in mice **283**

Short communications

G. Coruzzi, E. Poli: The stimulatory action of the calcium channel agonist Bay K 8644 on isolated duodenal muscle. Antagonism by nifedipine and verapamil **290**

L. Beani, C. Bianchi, L. Nilsson, A. Nordberg, L. Romanelli, L. Sivilotti: The effect of nicotine and cytisine on ^{3}H-acetylcholine release from cortical slices of guinea-pig brain **293**

No. 4 issued on December 6, 1985

U. Trendelenburg, K. Starke: Editorial **297**

K. Starke: Editorial **299**

K. J. van Charldorp, A. de Jonge, M. J. M. C. Thoolen, P. A. van Zwieten: Subclassification of muscarinic receptors in the heart, urinary bladder and sympathetic ganglia in the pithed rat. Selectivity of some classical agonists **301**

H. Schwörer, G. Lambrecht, E. Mutschler, H. Kilbinger: The effects of racemic bethanechol and its (R)- and (S)-enantiomers on pre- and postjunctional muscarine receptors in the guinea-pig ileum **307**

I. Pfeuffer-Friederich, H. Kilbinger: The effects of LSD in the guinea-pig ileum. Inhibition of acetylcholine release and stimulation of smooth muscle **311**

K. J. Broadley, P. F. Grassby: Alpha- and beta-adrenoceptor-mediated responses of the guinea-pig ileum and the effects of neuronal uptake inhibition **316**

J. M. May, P. W. Abel, K. P. Minneman: Binding of agonists and antagonists to β-adrenoceptors in rat vas deferens: relationship to functional response **324**

S. Patel, P. Slater, A. R. Crossman: A lesioning and 2-deoxyglucose study of the hyperactivity produced by an intra-accumbens dopamine agonist **334**

M. E. Brodie, J. Opacka: Dissociation between circling behaviour and striatal dopamine activity following unilateral deltamethrin administration to rats **341**

V. Raviprakash, S. K. Mishra, J. N. Panda: Effect of verapamil on the non-adrenergic response of the field stimulated rat vas deferens **347**

G. Koch, K. Wiedemann, H. Teschemacher: Opioid activities of human β-casomorphins **351**

A. Koman, M. Einarsson, L. Terenius: Agonist-antagonist properties of fluorescent opioid probes in the guinea-pig myenteric plexus-longitudinal muscle preparation **355**
